

# Course Prices Plant Production 2026

| Codes                  | Course Name                                                                                                                                               | Price ZAR |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Plant Production NQF 3 |                                                                                                                                                           |           |
| Mod 1                  | Apply routine maintenance and servicing plans and procedures                                                                                              | R 650     |
| Mod 2                  | Assist in farm planning and layout for conservation and rainwater harvesting                                                                              | R 650     |
| Mod 3                  | Demonstrate a basic understanding of the physiological functioning of the anatomical structures of the plants                                             | R 750     |
| Mod 4                  | Explain application of marketing principles within an alternative and dynamic agricultural marketing environment                                          | R 650     |
| Mod 5                  | Explain costing and the viability of an agri - business                                                                                                   | R 650     |
| Mod 6                  | Accommodate audience and context needs in oral communication                                                                                              | R 950     |
| Mod 7                  | Demonstrate an understanding of the use of different number bases and measurement units and an awareness of error in the context of relevant calculations | R 500     |
| Mod 8                  | Describe, apply, analyse, and calculate shape and motion in 2-and 3-dimensional space in different contexts                                               | R 800     |
| Mod 9                  | Introduction to organic certification and internal control system                                                                                         | R 800     |
| Mod 10                 | Explain human resource policies and procedures                                                                                                            | R 650     |
| Mod 11                 | Explain stores Inputs categories, labeling and storage methods                                                                                            | R 650     |
| Mod 12                 | Explain the planning and scheduling of tasks in a production environment                                                                                  | R 650     |
| Mod 13                 | Explain the propagation of plants                                                                                                                         | R 800     |
| Mod 14                 | Interpret factors influencing agricultural enterprises and plan accordingly                                                                               | R 650     |
| Mod 15                 | Incorporate basic concepts of sustainable farming systems into practical farm activities                                                                  | R 1250    |

|        |                                                                                                           |       |
|--------|-----------------------------------------------------------------------------------------------------------|-------|
| Mod 16 | Interpret and use information from texts                                                                  | R 950 |
| Mod 17 | Investigate life and work related problems using data and probabilities                                   | R 950 |
| Mod 18 | Produce crop in a hydroponic system                                                                       | R 800 |
| Mod 19 | Maintain water quality parameters                                                                         | R 500 |
| Mod 20 | Manage soil fertility and plant production                                                                | R 950 |
| Mod 21 | Monitor and co-ordinate the harvesting of agricultural products                                           | R 800 |
| Mod 22 | Monitor and supervise a food safety and quality management system in the agricultural supply chain        | R 650 |
| Mod 23 | Monitor natural resources management practices                                                            | R 800 |
| Mod 24 | Supervise the collection of agricultural data                                                             | R 950 |
| Mod 25 | Use language and communication in occupational learning programs                                          | R 950 |
| Mod 26 | Monitor pests, diseases and weeds on crops                                                                | R 500 |
| Mod 27 | Monitor plant manipulation                                                                                | R 650 |
| Mod 28 | Monitor the operation and maintenance of irrigation systems                                               | R 650 |
| Mod 29 | Use Mathematics to investigate and monitor the financial aspects of personal business and national issues | R 950 |
| Mod 30 | Write texts for a range communicative contexts                                                            | R 950 |
